introduction | about sunshine

The Sunshine Story

The founders of "Sunshine" have an international photographic background and a straightforward vision. We believe that the highest standard is just good enough. With this in mind, we established Sunshine Company in 1998. From there, the group quickly expanded to six specialized Divisions, and we decided upon the name "SunshineCo.". From two staff in the beginning, we grew to seventeen dedicated staff members today. Our team is our most valuable resource and the main reason for our success. The spirit within the company is what we're most proud of - it's fun, enthusiastic and professional.

What we bring to the table

We've had an amazing journey arriving to where we are today, and now feel even more confident that we are providing the best and most cost effective solution for your stills and video production needs.

Friendly, knowledgeable and experienced staff

- The most recent lighting and digital gear - everything under one roof
- Well maintained equipment in top condition
- Enough stock and backup for your biggest production
- After hour and weekend service
- Delivery service with own vehicles
- Own in-house repairs service

Lighting

Our impressive selection of equipment is guaranteed to satisfy your shoot requirements. With our wide selection of flash lighting - battery or studio packs, continuous lights from Daylight HMI, to Tungsten, fluorescent lights or LED Lights, grip gear, stands, scrims, reflectors etc. we can confidently say that we are the ultimate one stop rental outlet. With our own specialised Repairs Division we have all the expertise to do even advanced repairs on lighting equipment.

Digital -Stills

When it comes to digital photography, efficiency and speed is always a welcome bonus and in most cases a must. That is why we provide a wide range of most recent products to ease your workflow and help make your shoot that little bit easier. We are constantly updating hardware & software with the latest versions wherever possible. It is because of this commitment that we can honestly say that our machines are a pleasure to work with.

Digital -HDSLR Video

HD Video with DSLR cameras has become an every day application for photographers. We as SunshineCo. always aimed to find and offer the best available solution. That's why we trust established brands and are constantly looking out for unique and innovative products.

Production Vans

We chose to invest in the superior Mercedes brand due to its longevity, reliability and comfort factor. These vehicles are a true pleasure for shoots. Your team can relax and work in style. Our knowledge of the vehicles and how production teams work is passed onto our dedicated drivers. They have been working with us for many years and look after our clients with equal care.

We appreciate your support in our continued goal to provide top-of-the-range equipment and services for your shoots in South Africa and beyond.
